Sækko-Boy sack, grey, LDPE/recycle, 42x103cm

✓ Pro-environment recyclable plastic waste bags.

Product Description

With this slimline variant of the well-known Sækko-Boy bags, you have the option of fitting two bags to the same stand. This is done by fitting one bag to each of the stand's twin bag holders. This allows you to sort waste in more fractions in the Sækko-Boy stand without having to invest in new stands and waste management solutions. The bag comes in eight selected colors to facilitate user identification of which bag to use for sorting waste types. The waste bags are also available in sizes to match both the 40 l and 60 l Sækko-Boy stands. The bags are made from recycled plastic to minimize their environmental impact. They are suitable for collecting mixed waste. NOTE: This solution is only possible with the new versions of the Sækko-Boy stands, which have integrated removable bag holders.
